

SCRUBBERS FOR GAS PURIFICATION & ODOUR CONTROL

Many production processes produce residue, corrosive and toxic gases containing dust in different sizes and with unpleasant odors.

In waste water treatment plants, fertilizer and urea production, metallurgy, iron and steel production, power plants, chemical and pharmaceutical industries for incineration works, sulphur dioxide removal and also in many other sectors, purification of subject residue gases containing dangerous or unwanted content before releasing to atmosphere is an ethical, technical and also judicial necessity.

Bio-Scrubber for odour control system

Rectangular Gas Scrubber during pre-assembly
